

Brochures (Comic Books) From The Vapes Shops Series Project

One of our questions...
American Pagans, how can
our response to Climate
Catastrophe be better?

One answer...
Splint people's broken wings,
and bandage broken hearts
so they can read the charts
to fly away. Help facilitate
a joyful and creative
reality-transition.

Free - Take Some Poems, Pictures, Stories, Brief Philosophical Discussions

Entirely humane anti-violence material.
Written for ages Adult and Young Adult.

Each handout sheet is one piece of paper folded up and taped shut
so you only see a little of it. Suggestion: If you want to, take
one sheet for each member of your family or group of friends,
let each person open theirs. Or take a few privately for yourself.
Please feel free to discuss this material with our friendly staff.

**Greetings Friend,
My Good Fellow-Human,
My Worthy Gift-Recipient,**

**You have been selected to receive a
Gift Artwork as soon as yours is ready,
which will not be immediate.
(sorry)**

Your **Gift Artwork**, about the size of the Worcester Massachusetts telephone book, when it has been carved, assembled, and polished, and gassed up with high-test, will be posted directly from

**Spirit Hill Studio,
Stone Riley Proprietor**

**BUT I NEED YOUR POSTAL ADDRESS
TO SEND IT TO**

Please send me your postal address!!!

(Dear Abbess S, Never mind, I know where you are. This is just letting you know I'm making yours first, hoping it will be put in the abbey's library too. And thank you.)

By the way, gift recipients should feel free to swap the ornate gift boxes among themselves, for the paintings glued on them will be all different, so feel free to swap the boxes. But no, they are not superhero lunch boxes.

But seriously folks,
about the apparently impending
Death of Living Mother Earth actually, and the question of what Pagans should be doing around that, this has been the subject of 2019's work for me, and I'm hoping to sum it all up in your Gift Artwork, you see.

Or if I don't get it right in yours, perhaps the next recipient's.

But what's in the Gift Box?

Well, it's a small stack of papers, either "comic books" else "brochures" depending on your opinions about current art trends, the whole jostled, lightly organized short stack of widely variegated letter-size papers, stapled in nearly arbitrary sub-stacks, created trying to widely consult everybody meanwhile find some order in my panicked and disordered thoughts on the horrifying subject since this year began.

Well, how to start summing up those papers in the box for you, my dear recipient??? Start with the metaphysics of course!!!!

For this year I have switched entirely to Seth in this question. I now say the **Apparent Death**

of Our Living Mother Earth is something of a billion billion more dimensions than we can know with ordinary consciousness, and it is a thing of far far more good creative love and beauty than our eyes here are accustomed to see,

for it may be this narrow and constantly constricting threshold we are rushing over can be Entry Portal of The Good New Age.

That is like what Seth said.

So taking that as logical beginning premise, and striving to find other new ways to think about it, and ways to ask people, here and in large spirit domains, about it, for months, out of that, an ornamented box of papers will go to your address, eventually.

And your comments will be gladly accepted at any time.
